

ZEREKO ROCKBREAKERS

Hydraulic Rockbreaking system

Mining, Tunneling, Construction

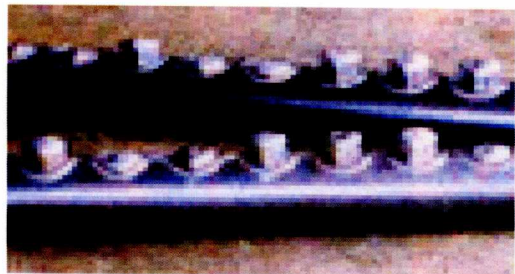

Zereko Introduces our new hydraulic Rockbreaking system

When Blasting is not an option, our new Rock Splitter is the answer. Innovative design and a powerful powered hydraulic pump combine for high productivity. Dust, vibration and noise-free fracture of rock and concrete.

Tunnels Underground Pipelines Downtown Areas

Here's how it Works!

The Rock or Concrete is pre-drilled
Power Cylinders are inserted into
the holes... Powerful hydraulic
pressure is applied. The Cylinder
Pistons expands at a 90 Degree
angle...

**The Rock is fractured in all directions...
and is then ready for removal.**
